Objective

Motivated software development enthusiast with a passion for creating intuitive digital experiences. Proficient in Java, HTML, and CSS, and eager to contribute to impactful projects while continuously advancing technical and problem-solving skills.

Education

B.Tech in Computer Science and Information Technology Marri Laxman Reddy Institute of Technology and Management Percentage: 78%	2022 – 2026
Intermediate in MPC Telangana Model School & Junior College Percentage: 72%	2020 – 2022
10th SSC Telangana Model School CGPA: 9.3	2019 – 2020

Technical Skills

Languages: Java, SQL, JavaScript

Frontend: HTML5, CSS3, React.js, Angular (Basics)

Backend: Node.js, Express.js

Databases: MySQL

Authentication: JWT

Soft Skills: Time Management, Adaptability

Projects

Drug Inventory and Supply Chain Management System - Developed a full-stack Drug Inventory and Supply Chain Management System using React.js, Node.js, Express.js, and MySQL/PostgreSQL to manage medicine inventory, procurement, and distribution operations. - Built secure RESTful APIs with JWT authentication and role-based access control (RBAC) for Admin, Vendor, and Hospital users. - Implemented real-time inventory tracking, low-stock alerts, procurement management, and analytics dashboards to improve supply chain efficiency. - Optimized database queries and backend performance to ensure scalability, data integrity, and responsive user experience. - Utilized Git and GitHub for version control and collaborative development.	GitHub
Doctor Plus – An AI-Powered Health Partner - Built an AI-powered healthcare web application using React.js, Node.js, Express.js, and Firebase with a scalable and responsive architecture. - Integrated Gemini AI API for symptom analysis and real-time first-aid recommendations to enhance healthcare assistance and decision-making. - Implemented Google Maps API for nearby hospital and ambulance location tracking to support emergency healthcare services. - Developed secure authentication, responsive UI components, and optimized backend APIs for improved application performance and accessibility. - Applied full-stack development best practices, API integration, and cloud-based data management for reliable healthcare solutions.
